

CWF Technical Assistance for the Root River MRBI Project

Fillmore Soil and Water Conservation District

Clean Water Fund Grant Awarded \$ 25,000

Grant Period (incl. extensions)
 From: October 20, 2010
 To: June 30, 2012

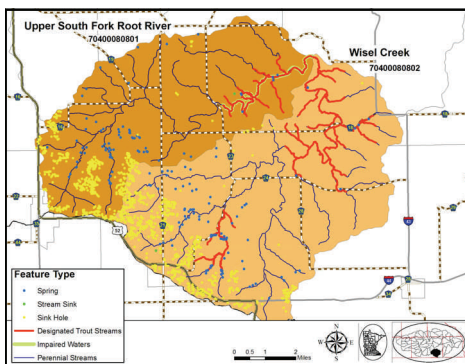

Funds Returned to State
 Type \$0
 Date Fund Returned: N/A

Budget by Category

Administration/Coordination	
Project Development	
Technical and Engineering	\$ 25,000
Construction	
Total CWF Budget	\$ 25,000
Expenditures to Date January 1 to June 30, 2011	
Technical and Engineering	\$ 2,932.50
Balance as of 3/31/11	\$ 22,067.50

The Mississippi River Basin Initiative (MRBI) was developed by the USDA Natural Resources Conservation Service to solve water quality issues related to nutrient and sediment runoff contributing to local water quality issues and to hypoxia in the Gulf of Mexico. The Fillmore SWCD submitted MRBI applications for two subwatersheds in the Root River watershed: Watson Creek and the Upper South Fork Root River/Wisel Creek. Priority practices in these watersheds are ag waste storage for dairy and beef producers, nutrient management for operations utilizing manure, and grazing management. These priorities take advantage of the existing technical staff in the SWCD office and benefit livestock production, which is crucial to maintaining hay and pasture acres on the steep terrain of the Root River watershed. Other practices being promoted include cover crops, no till/strip till, streambank protection, buffers, grassed waterways, contour buffer strips, grade stabilization structures, water and sediment control basins and forest management practices..

Outputs and Outcomes

Outputs: Two SWCD technicians, each with 25 years experience working with SWCD and NRCS programs and practices, will be supported for 1-2 days work per month in both watersheds to conduct outreach and promotion of MRBI-EQIP and WHIP practices and to provide technical assistance to land-owners implementing practices. They will primarily work on soil erosion control practices, such as grassed waterways, terraces, and grade stabilization structures. Practices will need to meet the FOTG standards. The existing technical staff working in these watersheds will be the Engineering Technician, the Root River Grazing Specialist, and the Nutrient Management Specialist. The Engineering Technician has 8 years of experience designing feedlot fixes with the JPB Engineer, managing state cost share projects and grants, regional 319 grant projects and those funded using MPCA base grant funds. She completed 18 feedlot projects in 2010. The Grazing Specialist has been with the SWCD since April of 2009. He also is a farmer who practices rotational grazing on his farm. He has been working closely with NRCS Grazing Specialist to implement EQIP prescribed grazing contracts with about 35 producers on about 4,000 acres, as well as writing new grazing plans. The Nutrient Management Specialist has been doing nutrient management plans with the SWCD since March 2007. She previously worked for a local cooperative. She is a certified planner with NRCS developing new and updated comprehensive nutrient plans for over 120 producers on over 50,000 acres.

CWF Technical Assistance for the Root River MRBI Project

**Fillmore
Soil and Water
Conservation District**

**Clean Water Fund Grant
Awarded \$ 25,000**

Grant Period (incl. extensions)
From: October 20, 2010
To: June 30, 2012

Outputs and Outcomes cont'd

Outcomes:

October - December 2010: SWCD staff assisted with developing a vision statement for the Root River for use by the Midwest Natural Resources Group along with recommendations for support from the federal agencies to enhance efforts in the MRBI watersheds. SWCD staff attended a meeting for all the MRBI partners in the Root and Cedar watersheds on November 18 in Preston to discuss progress to date, plan for the next sign up, and get input on monitoring.

January - March 2011: The technical staff met in January to develop a list of about 30 landowners in each watershed to begin contacting. There was extensive discussion with the NRCS state office staff regarding some EQIP changes for such things as cover crops and streambank projects to be incorporated into the MRBI payment docket. A mass mailing went out in March to both watersheds plus the Fillmore County portion of Rush-Pine watershed (623 pieces total). About 50 landowners in all have contacted the SWCD office or have been contacted by SWCD staff about MRBI who have interest in implementing practices.

April—June 2011: Work continued with contacting landowners and implementing practices signed up under new EQIP and WHIP contracts. Meetings were held to determine how to use NRCS TA funds designated for MRBI.
