Map of Conservation Practices in Fillmore County

(as reported in eLINK for the MN Board of Water and Soil Resources)

Outputs

and

Outputs:

- 2015: Two FY2016 cost share contracts were approved in 2015. No projects completed using FY2016 grant funds.
- 2016: Six projects completed in 2016; four grassed waterways totaling 5,560 feet and two terrace projects totaling 2,050 feet.
- 2017: Six contracts approved by the SWCD Board in 2017. All six projects completed and paid (5 waterways totaling 4724' and 0.6 ac critical area seeding). Rick Grooters and Doug Keene JAA: 376 hrs + 175 hrs = \$23,942.67 pd from State CS TA funds, Conservation Delivery Grant and Fillmore County appropriation to the SWCD.

Outcomes:

Water pollution reduction estimates for projects completed:
 Estimated Soil Savings = 53.39 T/year
 Estimated Phosphorus reduction = 26.79 lbs./year
 Estimated Sediment (TSS) reduction = 26.79 T/year

Waterway needs are often evident after a rain event. A waterway's purpose is to:

- convey runoff from terraces, diversions or other water concentrations without causing erosion or flooding.
- reduce gully erosion.
- improve water quality.
