

2019 Winter Manure Management Planning Workshop

****Info to Improve Management Plans & Fulfill State Requirements****

Greetings Feedlot Owner and/or Operator:

You are invited to a Manure Management Planning Workshop that will provide instruction on how you can develop your own Manure Management Plan (MMP) using the Microsoft Excel compatible version for a MMP from the MN Pollution Control Agency. If your farm operation has a laptop that is regularly used, and can be utilized for annual updates to your MMP, please bring it. Each Attendee will be provided with their own workstation to utilize while local experts offer step-by-step instructions. If you are new to computers, you are welcome to bring a family member or friend who might help you complete your MMP. Why complete your own MMP?? Save money and take control of your land application of manure and commercial fertilizers by putting your nutrients to work for you!

When: Tuesday, March 5, 2019

Time: 9:45AM to 3:00 PM, with lunch provided. If you can't make it right away in the morning, feel free to come when you're available. The goal of this workshop is to help you develop your own MMP and we understand you all have busy schedules.

Location: Southeast Technical College, 1250 Homer Rd, Winona, MN in Computer Lab 132

****If available, please bring: field maps with acreages, 2018 crop year manure application records, Commercial fertilizer plans for 2019, manure nutrient tests, soil phosphorus tests, and a flash drive if you plan to use one of our computers.*

AGENDA

9:45 AM – Sign in, meet and greet; Computer Set-up; Coffee and donuts

10:00-11:00AM – Group introduction to MMP workbook and how to use it to improve your bottom line.

11:00AM – 2:30PM – Individualized work on plans and final questions, working lunch
