

FILLMORE SOIL & WATER CONSERVATION DISTRICT

*Promoting natural resource
stewardship by providing
educational, technical &
financial assistance.*

CONSERVATION DISTRICT WATER QUALITY STATS

Nitrate Screening

Fillmore SWCD has run more than **9,700** nitrate screening samples since **2010**. These samples include private wells, public water supplies, surface water, and groundwater springs. Fillmore SWCD began analyzing nitrate samples at no cost in 1993.

Drinking Water

Fillmore SWCD Water Quality Lab has run **1,514** drinking water samples for bacteria since **2009** (as of 11/01/2023). These samples include private wells and public water supplies.

Fillmore SWCD staff, in partnership with MDA, have run more than **9,700** nitrate screening samples since **2010**. These samples include private wells, groundwater springs, and streams, and have been analyzed at **zero cost to landowners**.

DISTRICT PROGRAMS & SERVICES

- Root River One Watershed One Plan
- Private Well Testing - Bacteria
- Drinking Water Nitrate Screening
- Well Sealing Cost-Share
- Volunteer Nitrate Monitoring Network
- Groundwater Dye Tracing
- Root River Watershed Pollutant Load Monitoring Network
- Root River Field to Stream Partnership
- MN Ag Water Quality Certification Program
- Wetland Conservation Act
- Education/Outreach Events
- Ag BMP Loan Program
- Grazing Management Plans
- Soil Health Programs & Education
- Nutrient Management Plans
- Buffer Law Enforcement
- Rain Barrels
